# Acknowledge

In the process of graduation, we have received a lot of help, suggestions, and enthusiastic advice from our teachers, family and friends. We sincerely thank Aptech Education for bringing the experience as well as practical skills in the project that have brought our skills to a higher level.

We would like to extend our heartfelt thanks to Mr. Le Thanh Nhan, a teacher of FPT Aptech for always being dedicated and professional. His mentoring and technical expertise has Without the knowledge and experience of our superior that has guided us throughout the entire process, this project wouldn't have succeeded.

I, Vo Minh Tien, as the group leader, am immensely grateful to the entire team for their hard work and dedication. Each team member's unique contributions have collectively led to the realisation of our goals. Your collaborative spirit and tireless efforts have made this project a truly rewarding experience.

And we sincerely thank the families and friends of our team members for their great enthusiasm and support during the project and providing us with time and space to focus on our Project.

Thank you all for being an integral part of this journey. Your contributions have made this project a success, and I am truly grateful for the collaborative effort that has brought our project to life.

# Synopsis

The Objective of this program is to give a sample project to work on real life projects.

These applications help you build a larger more robust application.

The objective is not to teach you the software's but to provide you with a real life scenario and help you create basic applications using the tools.

You can revise the topics before you start with the project.

These programs should be done in the Lab sessions with assistance of the faculty if required.

It is very essential that a student has a clear understanding of the subject.

Kindly get back to eProjects Team in case of any doubts regarding the application or its objectives.

<b>Design Plan:</b> Online Aptitude Test	<b>Document Name:</b> Problem Definition	<b>SWD/Form No.01/PD/Ver1.0</b>
<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 2 of 57</b>

## Problem Definition

### INTRODUCTION

The Webster organisation is one of the leading organisations in the world of Oil-Gas companies. They have various branches throughout the world. It has various bonds with different multinational companies. The company wants an application to be built for the jobseeker where the entire candidate as per the criteria will appear for the online test and based on the result of this the candidate will go for further rounds.

They have requested us to create a web application using the latest technology that is .NET 8, C# language, using ASP.NET Core MVC. The Database we will use SSMS for local use and deployed using Azure. Team will be using Github and Azure Devops to manage the development.

As part of the company's recruitment process, there is a need to implement an efficient and user-friendly Online Aptitude Test for evaluating the skills and capabilities of prospective candidates. The current manual assessment process is time-consuming, prone to errors, and lacks scalability, hindering the seamless identification of top-tier talent.

Client has forwarded all the data that they have required in the application, which is stated below:

	<b>Prepared by (Student)</b>	<b>Approved by (Faculty)</b>
	<b>Project Group No: 5</b>	LE THANH NHAN
<b>Signature</b>		
<b>Date</b>		

<b>Design Plan:</b> Online Aptitude Test	<b>Document Name:</b> Problem Definition	<b>SWD/Form No.01/PD/Ver1.0</b>
<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 3 of 57</b>

The application should perform the following functions:

URL should be <https://websterapplicantexam.com>.

Page requirements:

- Main page (Login page)
- Applicant:
  - Dashboard
  - Exam page
  - Result page
  - Logout
- Manager:
  - Dashboard
  - View Applicant
  - Create/Edit Applicant
  - View Report
  - View Questions
  - Add/Edit Questions

1. Login page should contain 2 types of logins: one for Applicant, one for Manager.
2. Applicant dashboard should contain 3 links to exam, only first one is available and accessible.

	<b>Prepared by (Student)</b>	<b>Approved by (Faculty)</b>
	<b>Project Group No: 5</b>	LE THANH NHAN
<b>Signature</b>

<b>Design Plan:</b> Online Aptitude Test	<b>Document Name:</b> Problem Definition	<b>SWD/Form No.01/PD/Ver1.0</b>
<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 4 of 57</b>

3. Applicant exam should start at the scheduled time, containing 5 questions randomized from the Manager's question list and automatically submitted when time runs out, else they can choose to submit early and move on to the next Exam.
4. Results screen should show when they are done with all 3 Exams, calculating the total score from all the answered questions and pop-up "You have passed this round, next is the HR round" if the score is satisfactory. Then logout out of the session.
5. Manager dashboard should show all functions of the Manager such as: View Applicants, View Questions, Add/Edit Applicants, Add/Edit Questions, View Report.
6. View Applicants should show the list of Applicants, filterable by Name, other Details, or score if necessary. Allow Manager to click on Applicant to go into edit page or click on "Submit New Applicant" to go to Add Applicant page.
7. View Questions should show the list of Questions, Exam Type of question, links to Add and Edit / Delete Questions.
8. Add/Edit Applicants should show input boxes for all Applicant Details and a button to Save.
9. Add/Edit Questions should show input boxes for all Applicant Details and a button to Save.
10. Applicant and Manager navigation bar should show link to Logout

<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 5 of 57</b>

## Customer Requirements Specifications

- **MANAGER:**

**Input:**

- Enter the details of the candidates appearing for the interview. Details to be maintained are Education details, Personal details, Work Experience
- Allocate the Username and Password for the candidates.
- Edit, update, add, save, delete the test Questions
- Filtering info such as Reports, passed Candidates, question types

**Process:**

- Handle saving Candidate, Questions
- Handle setting Candidate Usernames and Passwords
- Handling setting and saving Questions
- Generating Report based on user input filters

**Output:**

- View the list of all the candidates who are or have appeared along with the result (if achieved).

<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 6 of 57</b>

- View info of specific Candidates
- View report statistics. Report section must be added for viewing the generalised data which can be filtered by date, week or month.
- View info of Questions used in the Exam.

● **CANDIDATE:**

**Input:**

- Each candidate will have their login details provided to them by the Manager. These details must be entered in the candidate's login section.
- Clicking on the first Exam in the Dashboard
- Answering the Questions
- Submitting the Exam
- Logging out after finishing the Exam

**Process:**

- Calculate the Exam score
- Handle time limit for the Exams
- Handle validation to prevent Candidates from going back to finished Exams.
- If the candidate passes the test, then their names are transferred for the next (HR) round, their data transferring to a new table to be referred to by concerned persons
- Handle logout after finishing the test and showing Results.

### Output:

- Viewing List of Exams
- Viewing List of Questions
- Viewing Results Page

## Hardware / software requirement

1.	System	Windows 10 or above
2.	Software	Visual Studio 2019 or later, SQL Server 2000 (or later)
3.	Web Browser	Later versions of Edge, Chrome, Firefox, etc...
4.	Fonts	Standard fonts such as Unicode: Arial, Tahoma, Lucida Console, Times New Roman, etc...
5.	Other requirements	A working internet connection.

# Review 02

<b>Design Plan:</b> Online Aptitude Test	<b>Document Name:</b> Architecture and Design of the Project	<b>SWD/Form No.03/ARD/Ver1.0</b>
<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 9 of 57</b>

## Architecture and Design of the Project

We will be using 3-tier architecture for this project:

The User will interact with the Front-end of the webpage, then the user Input will be sent as a request to the Web Server containing the App logic, Database and File System. It will handle all the required tasks and will return to the User the expected output on the View. An explanation for all three tiers are below:

	<b>Prepared by (Student)</b>	<b>Approved by (Faculty)</b>
	<b>Project Group No: 5</b>	<b>LE THANH NHAN</b>
<b>Signature</b>		
<b>Date</b>		

<b>Design Plan:</b> Online Aptitude Test	<b>Document Name:</b> Architecture and Design of the Project	<b>SWD/Form No.03/ARD/Ver1.0</b>
<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 10 of 57</b>

### **Presentation tier:**

This is the topmost level of the application. It is a layer that users can access directly (such as a web page, or an app's GUI). This is the Front-end of our project where the user can view and interact with the web app.

### **Business / Logic tier:**

The business tier is pulled out from the presentation tier and controls an application's functionality by performing detailed processing. Through the web server, the request from the user will be handled by the app logic and will return to the presentation tier where the results are displayed to the end-user.

### **Database tier:**

The database tier includes the data mechanisms (database servers, file shares, etc.) and the data access layer that encapsulates the data mechanisms and exposes the data for processing. The data access layer should provide an API to the application tier that helps manage and process the data. This is the Database of our application where we will get the data to handle tasks in the business tier.

We will be using ASP.NET Core MVC for this Application, it is explained as below:

#### **1. Model:**

	<b>Prepared by (Student)</b>	<b>Approved by (Faculty)</b>
	<b>Project Group No: 5</b>	LE THANH NHAN
<b>Signature</b>		
<b>Date</b>		

<b>Design Plan:</b> Online Aptitude Test	<b>Document Name:</b> Architecture and Design of the Project	<b>SWD/Form No.03/ARD/Ver1.0</b>
<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 11 of 57</b>

- The Model represents the core business logic and data of the application.  
In the case of the aptitude test application, the Model would handle tasks such as:

- Storing and managing candidate data.
- Defining the structure of the aptitude tests, including questions, answers, and correct solutions.
- Handling scoring and result calculations.
- Managing communication with the database for persistent data storage.

## 2. **View:**

- The View is responsible for presenting the user interface to the applicants and displaying information from the Model. For the aptitude test application, the View would include:
  - UI for Applicants to take the aptitude test.
  - Feedback on test results.
  - UI for Managers to view reports and analytics.

## 3. **Controller:**

	<b>Prepared by (Student)</b>	<b>Approved by (Faculty)</b>
	<b>Project Group No: 5</b>	LE THANH NHAN
<b>Signature</b>		
<b>Date</b>		

<b>Design Plan:</b> Online Aptitude Test	<b>Document Name:</b> Architecture and Design of the Project	<b>SWD/Form No.03/ARD/Ver1.0</b>
<b>Effective Date:</b> 11/12/2023	<b>Version 5.0</b>	<b>Page No: 12 of 57</b>

- The Controller acts as an intermediary between the Model and the View.

It receives user inputs from the View, processes them, and updates the Model accordingly. The Controller handles:

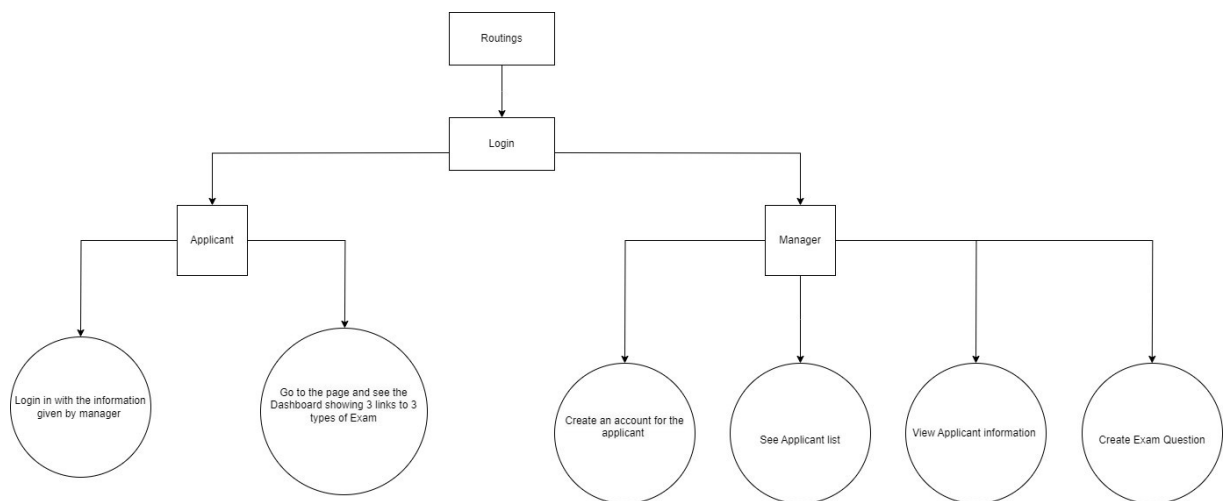

- Handling user interactions during the test, such as submitting answers or navigating through questions.
- Initiating actions based on user inputs, like starting or ending a test.
- Updating the Model with the results of the aptitude test.
- Managing the flow of the application and controlling the navigation between different views.
